

INNOVATION. MADE EASY

Become a future-ready business with the agility to adapt, re-align, innovate, and grow

FINANCIAL FIRMS NEED TO MODERNIZE AND DISRUPT. BUT CHANGE ISN'T EASY

When people think of finance, thoughts go to traditional institutions with tried-and-tested processes. In financial services firms where keeping risks to a minimum is part of business, experimentation and radical change contrasts with their nature.

But firms need to evolve. They must respond to the changing demands of customers and the increasingly digital way they want to do business. They need to stay ahead of an ever-growing list of competitors ranging from fintech startups to the might of big tech companies seeking to branch out into financial services.

Innovation is the answer – but how?

LOWERING THE BARRIER TO INNOVATION

Firms seeking to become more innovative face challenges.

Do they access the technologies – like AI, edge computing, IoT connectivity or advanced analytics – to drive innovation? Do they have the core infrastructure to deploy it? Do they have ready access to the skills who can deliver it? For smaller firms, such things can seem like a pipe dream.

With ECI Cloud Solutions, we support you to get to market faster with new services and solutions – effectively lowering the barrier to innovation and empowering you to change.

UNLOCK INNOVATION, DEPLOY IT EASIER, AND SCALE IT ACROSS YOUR BUSINESS

ECI's Cloud Solution, using Microsoft Azure, is a complete offering for cloud readiness. Cloud can be the catalyst for making innovation happen, because:

Lower upfront IT investments means more resources for innovation: Pay-as-you-go cloud models and a shift from CAPEX to OPEX can help you redeploy the finances for implementing new services and applications.

Cloud models remove IT complexity: When legacy data centers and infrastructures hold you back (through data silos, age, or expense), cloud models allow you to upgrade and deploy SaaS technologies as soon as they are available.

You can rapidly prototype, develop and deploy new services – upgrading your business model rapidly: Applications and environments can be rapidly engineered to respond to new market opportunities. Cloud assists with containerization, and the building and testing of new innovations in a more risk-free way.

Improved data consolidation, management, and visibility enables better decision making: Cloud helps bring all your data together, empowering you with a single view across the business to truly understand and analyze business and customer needs. Cloud also helps with data access, visibility, and collaboration for DevOps teams.

WE CAN HELP YOU

Secure access to your assets and data, anytime and anywhere

Proactive cloud management to keep you compliant and protected

A lower barrier to innovation and the ability to get new services to market faster

Vastly improved abilities to collaborate with Microsoft SaaS apps

Better cost controls

YOUR PARTNER TO MAKE INNOVATION EASY

We have deep experience of specific cloud platforms, such as AWS and Azure

We understand today's cloud journey – and how to get you there

We consult with you to build a roadmap and strategy for your real needs

We align with all relevant industry standards and regulatory compliance
